

VULVAR ANATOMY

Mons Pubis

The protective cushion for the pubic bones.

External Clitoris

The pleasure powerhouse! This nerve dense area's primary purpose is sexual pleasure.

Urethral Opening

Where urine leaves the body.

Labia Majora

The "outer lips" protect the more sensitive Labia Minora.

Labia Minora

The "inner lips" that help protect the delicate tissues around the vaginal opening and urethral opening.

Vaginal Opening

The entrance to the vaginal canal.

Perineum

The space between the vulva and anus. The perineum helps support the pelvic floor.

SEXPLORATIONS #6
